
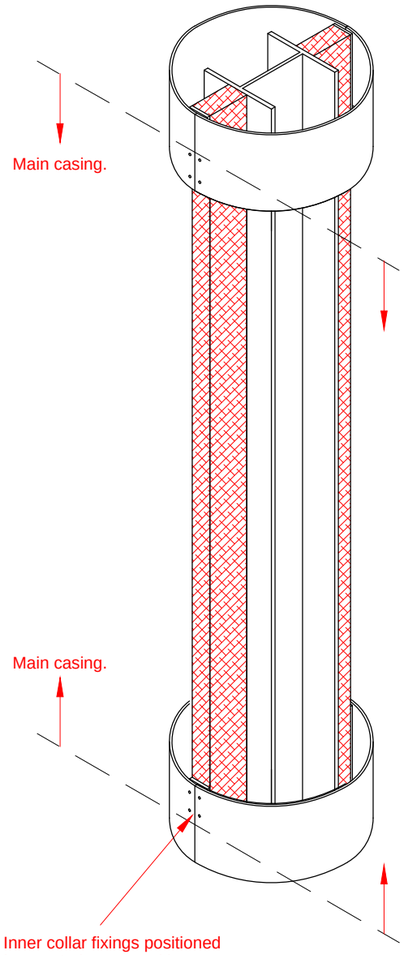
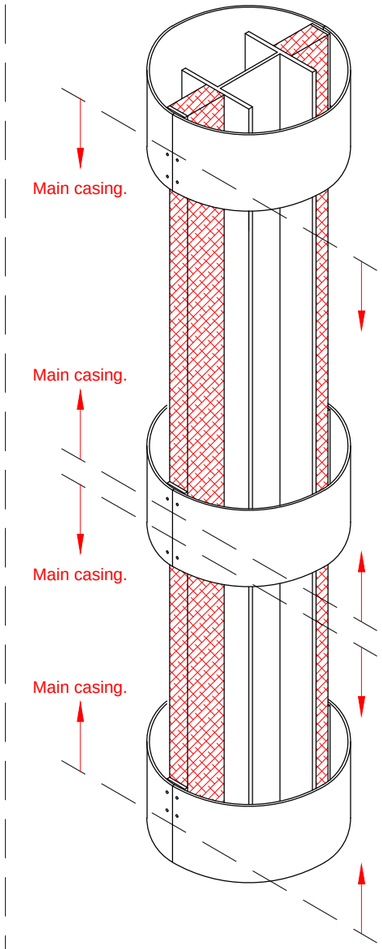
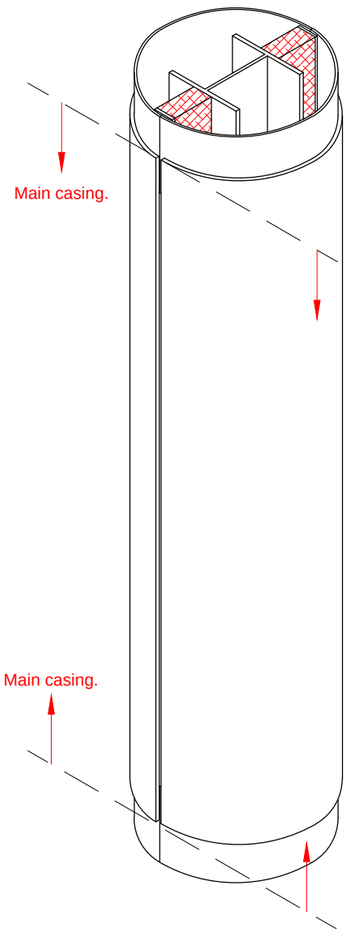
Note:
Inner collars sent over size due to varying options of feature joints available.
Inner collars scribed on suit and butt jointed together.

Inner collar fixing to head follows the same installation procedure as the base inner collar



Should the column be over 3 Metres or a horizontal shadow gap be required then a centre inner collar will be needed.
Installation procedure the same as the base inner collar. (c/w packer)





Main Casing positioned over inner collars

Mechanically fix inner collars to the timber mullions (c/w with packer) to head and base as required

Inner collars sent over size due to main casing feature joint options. (width of feature joint)

Insert inner collar into main casing (making sure the inner collar is securely pressed in) align one edge with the main casing edge and the opposite side to the furthest edge of the joint overhang (Male Section) and trim to suit.
Repeat for both halves.

Only place the fixings in the areas that will be covered by the main casing enclosure.
(fixings to be countersunk to allow over fitment of main enclosure)
